Weekly Report - Week 8

Name: Tianyun Lei

Student ID: 1454701

Date: 2025-05-04

1. Tasks Completed This Week

- Defined a custom exception class and implemented a unified exception handler using `@ControllerAdvice` to standardize backend error management.

  Link: https://github.com/SWEN90017-2025-SM1/OAS-web-based-oral-assessments/blob/dev/backend/src/main/java/org/swen90017/oas/exception/GlobalExceptionHandler.java
- Created a common Result/Response encapsulation class and an ErrorCode enumeration to ensure consistent API responses and ease of maintenance.
  Link: https://github.com/SWEN90017-2025-SM1/OAS-web-based-oral-assessments/blob/error-handling/backend/src/main/java/org/swen90017/oas/utils/ResponseUtils.java

Time allocated: Approximately 5 hours

2. Key Issues Encountered

Encountered an issue where Lombok annotations were not working as expected, which required manual getter/setter definitions in some cases.

3. Plan for Next Week

Based on the frontend prototype, define the initial structure of request and response formats and compile them into a shared API documentation.
