WEEK 4 REPORT - BENYUAN WANG

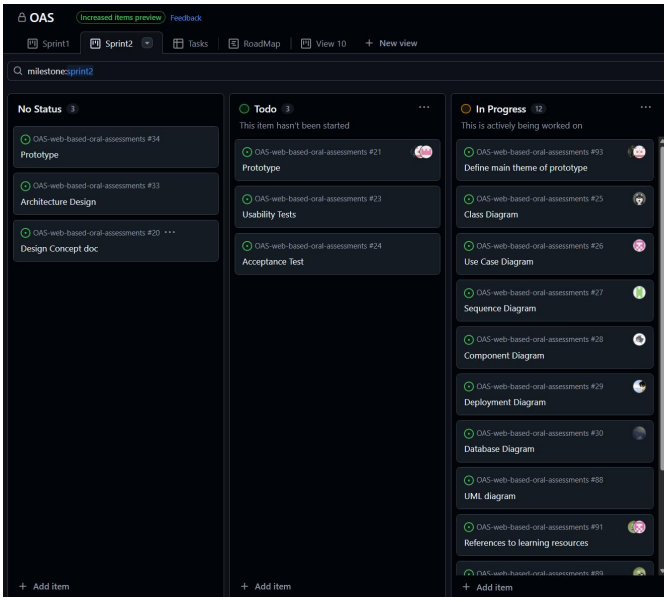

Name: Benyuan Wang
Student ID:1492846
Date: 30.3.2025

1. Work Completed

- Have created the user story document and completed the basic structure of the document, such as the definition of items in tables; the determination and explanation of story priority and story size.
- Conceived and wrote epic1 and related stories, as well as checking and making minor changes to other epics, and double-checking and considering the size and priority.

- Participated in Sprint 1 retrospective and review meeting
- Contributed to Sprint 2 planning session

- Attended group meetings to discuss project progress and next steps
- Participated in technical stack discussions and helped determine the preliminary technology choices for the project
- Collaborated with team members on finalizing Sprint 1 deliverable

Time allocated: Approximately 8 hours (5 hours edit user story, 1 hour Sprint 1 retro/review, 1 hour Sprint 2 planning, 2 hours group meetings and collaboration)

2. Issues Encountered

Epic division: How to reasonably divide the system functions into different epics according to unified standards.

Definition of story priority and size: It is difficult to comprehensively define the priority and size of all stories before actual development and delivery, because it is difficult to ensure that we have considered all issues and difficulties and that we are in complete agreement with the customer.

3. Work Planned for Next Week

- Begin work on user case diagram and reference of learning resources as assigned in Sprint 2 planning
- Review user stories and acceptance criteria to ensure prototype addresses core functionality
