Week 9 Report

Yanqing Shi 1511676

Tasks Completed

- Completed the Hi-Fi prototype design of the Super Admin function in Figma.
- Discussed the new functional definitions for Super Admin and Course Admin in the account creation phase, and made new modifications and implementation plans.

Issues Encountered

- At present, there are some problems with the logic of Course Admin account creation, which is not in line with the more mainstream email activation mode, and it is not very suitable for the required database structure, so it needs to be adjusted. (Solved)

Plan for Next Week

- Redefining the Course Admin account creation user flow, adding a new section of email activating modules in the Course Admin section, and modifying the account creation function in the Super Admin section.
