Week4 Report - Yun Chen

name: Yun Chen
student id: 1412174
Date: 24/8/2025

1. Work Completed

1. We replaced the original `register` endpoint with an `onboarding` endpoint, added a `verify` endpoint to let users preview previously imported personal information during signup, enabled editing of personal details within the registration/onboarding flow, and added a SuperAdmin endpoint to view course-related information.(3h)

https://github.com/SWEN90017-2025-SM1/OAS-web-based-oral-assessments/commit/1bdcccbf3d351845dcda85d04d4f4f841feeabc6#diff-797fa41531e8eecad9c834f4e673dff9b560b3c3777f35a002d49ef729fb97e6

2. During frontend integration, we refined several previously incomplete features: added support for **course admins** in the registration-activation flow; fixed incorrect state toggling in the **updateStatus** endpoint; and added the **assignment** association in the CSV import endpoint.(3h)

https://github.com/SWEN90017-2025-SM1/OAS-web-based-oral-assessments/commit/81155e2e45c5b486a41a1cb4c7415e75bfc48ed0
https://github.com/SWEN90017-2025-SM1/OAS-web-based-oral-assessments/commit/9faa77073480baa2284cba97cf944f772ea33f5a

3. Based on the defects reported by Benyuan and Weiran after testing, the following changes were made：

- **Revoke: input admin ID is inactive → should return 400, currently 404**
  - Cause: Some users were created without a corresponding role (dirty data).
  - Fix: Temporarily not handled.
- **Revoke: `reason` field is unused (perhaps the `transaction` table isn't implemented?)**
  - Fix: No current requirement.
- **`update` status API didn't update the database and always returned `active`**
  - Status: Already fixed previously.

- **Pagination for listing admins/courses returns `totalPages` and `totalItems` as 0**
    - Cause: MyBatis-Plus pagination interceptor wasn't enabled.
    - Fix: Added configuration to enable the interceptor.
- **`/api/superadmin/admins/{id}`: `invitedAt`, `registeredAt`, and `lastLoginAt` not set**
    - Cause: Missing assignments for these fields.
    - Fix: Added the corresponding set operations.
- **Inviting an admin with a valid email returns 409 "email already exists"**
    - Cause: When `sisUsername` is provided, the code first constructs the email using `sisUsername + domain`, leading to a unique email but a duplicated `sisUsername`.
    - Fix: Swap the validation priority/order.
- **`import student` CSV fails to write records**
    - Cause: New columns were added, but the batch-insert SQL wasn't updated, leaving non-null fields empty.
    - Fix: Update the batch-insert SQL statement.

Total : 9h

2. Next Week Plan

- **Fixed some bugs (if identified by the testing team).**
- **Completed Epic 5.**
