WEEK 5 REPORT - BENYUAN WANG

Name: Benyuan Wang
Student ID:1492846
Date: 6.4.2025

1. Work Completed

- Have drawn a use case diagram for the project.(view diagram)
- Created and wrote the use case description corresponding to the use case diagram, defining the process steps and the expected correct results and error feedback.(view documentation)
- Discussed with the backend team the choice between using MyBatis and MyBatis-Plus.
- Discussed database design and the ERD with team.
- Attended group meetings to discuss project progress and github repository and wiki's structure

Time allocated: Approximately 8 hours (1 hour draw diagram, 3 hour edit description, 2 hour team discussion, 2 hours group meetings)

2. Issues Encountered

GitHub repository structure: What exactly is the warehouse structure designed to be more readable and concise, and include all documents without duplication.

3. Work Planned for Next Week

- Prepare for development by deploying a local development environment and review the relevant technology stack in case you encounter problems during development.
