Week5 Report - Yun Chen

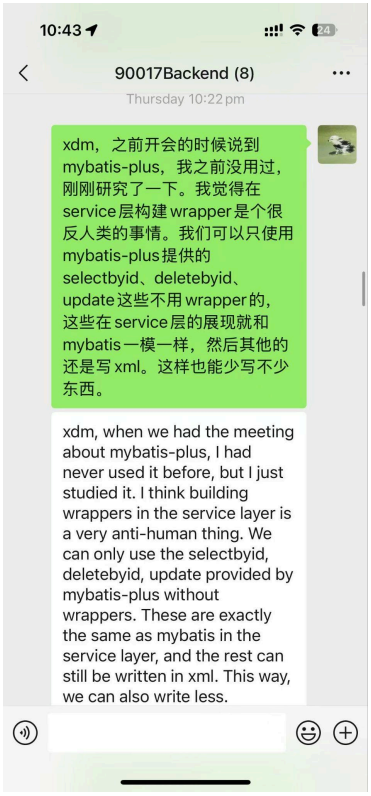

name: Yun Chen
student id: 1412174
Date: 6/4/2025

1. Work Completed

- finished the documentation of main technology and reuse plan.(3h)

https://github.com/SWEN90017-2025-SM1/OAS-web-based-oral-assessments/tree/main/Docs/Design%20Concept

- Discussed with the backend team the choice between using MyBatis and MyBatis-Plus.(1h)

screenshot with translation

- Discussed database design and the ERD with team members.(1h)

Haocheng Li: Research similar Existing application Comparative Analysis and Develo...

- Attended group meetings to discuss project progress and github repository and wiki's structure (2h)

total 7h

2. Issues Encountered

Copying documents from GitHub to the wiki is a tedious process, as it requires creating a separate page for each document and managing the links between them. Fortunately, Nemo wrote an automation script that makes the transfer much easier.

Although it's not an issue at the current stage, the problem of low reusability caused by having to create a separate wrapper for each query when using MyBatis-Plus was mostly resolved after discussions with Dongqiang and some research.

3. Next Week Plan

- Since I have completed the tasks assigned to me in Sprint 2, I will participate in the design of various diagrams in the next phase and provide support to other backend team members.
