WEEK 6 REPORT - BENYUAN WANG

Name: Benyuan Wang
Student ID:1492846
Date: 13.4.2025

1. Work Completed

- Have updated the Use Case Description with a administrator case.(view documentation)
- Created and wrote the UC_CONNECT_US.md which is a documentation about mapping use cases and use stories to increase readability.(view documentation)
- Review Yun Chen's documentation work(both Reuse plan and List Main technology).

- Working on encapsulate commonly used utility classes for consistency and to reduce code duplication, but still feel confused and in need of discussion.
- Attended group meetings to discuss project progress and github repository and wiki's structure

Time allocated: Approximately 7 hours (1 hour update description, 1 hour edit mapping, 2 hour review documentation, 1hour coding, 2 hours group meetings)

2. Issues Encountered

Encapsulate classes: I have already started to try to encapsulate commonly used classes, but I still don't know much about how formal projects are standardized and encapsulated, and the code encapsulation style and format still need to be further discussed with the back-end members.

3. Work Planned for Next Week

- Working on encapsulate commonly used utility classes.
- May write a test plan and program that follows the progress of the project.
