Weekly Report (Week 6)

Ian Chi [1579898]

Q1: Project Contributions and Individual Achievements

This week, I focused on enhancing project management systems and advancing frontend development:

Product Owner Contributions:

1. **Sprint Task Management**: Added size and estimate metrics for all tasks in Sprint 2, enabling better resource planning and progress tracking.
2. **Kanban Board Enhancement**: Configured the Kanban board to display relationship information (parent tasks, subtasks), improving task hierarchy visibility.
3. **Timeline Configuration**: Set up start and end dates for all tasks to enable future burn-down chart generation for more effective sprint monitoring.
4. **Client Communication**: Arranged a mock client meeting with Geela as the actual client is currently on leave.
5. **Workflow Documentation**: Created comprehensive GitHub Workflow Guidelines documenting issue status procedures, review processes, and Pull Request linking protocols.

Frontend Development Work:

6. **Examiner Interface Design**: Designed and began implementing key pages for the examiner role, including:
    - Available assessments page
    - Scheduling interface
    - Assessment management page
    - Comment submission interface

- *Note: This frontend work is still in progress and will be shared via screenshots rather than Figma or GitHub at this stage.*

Time Allocation: (Total: 7.5 hours)

- Kanban and Sprint Configuration: 2.5 hours
- GitHub Workflow Documentation: 1 hours
- Frontend Design and Implementation: 4 hours

Q2: Challenges Encountered

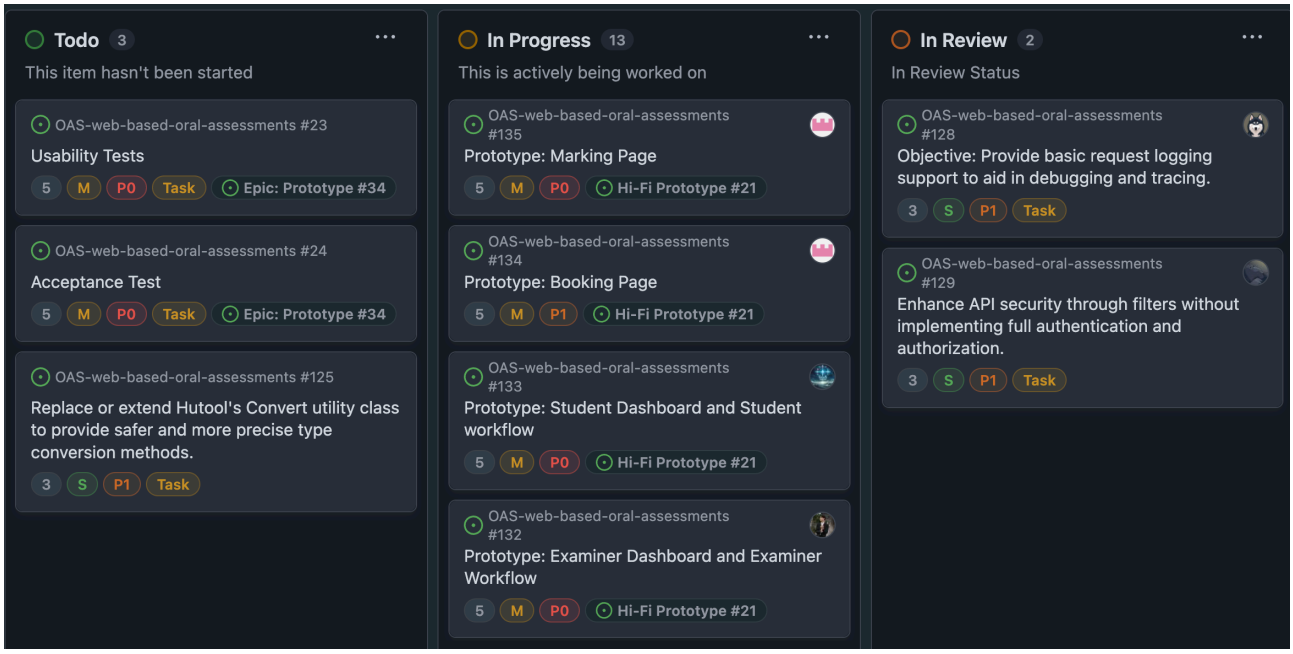

- No issue

Q3: Planned Activities for Next Week

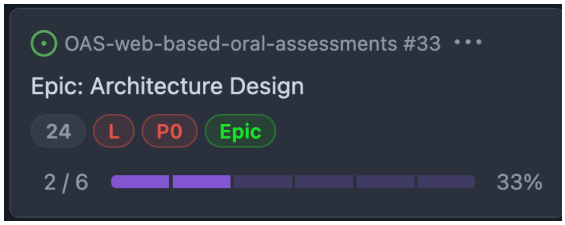

- Complete the initial versions of the examiner interface pages prototype and share with the team for feedback.
- Conduct sprint review meeting to evaluate progress against Sprint 2 goals.
- Update the project documentation to reflect the current state of development.
- Conducted a mock client meeting with Geela as the actual client is currently on leave.
- Continue refining the GitHub project management system based on team feedback.

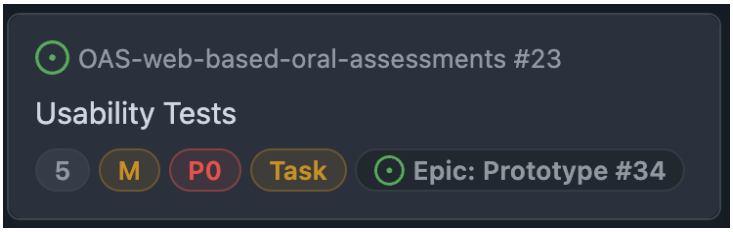

Evidence of work (Screenshots)

1. **Sprint Task Management**:

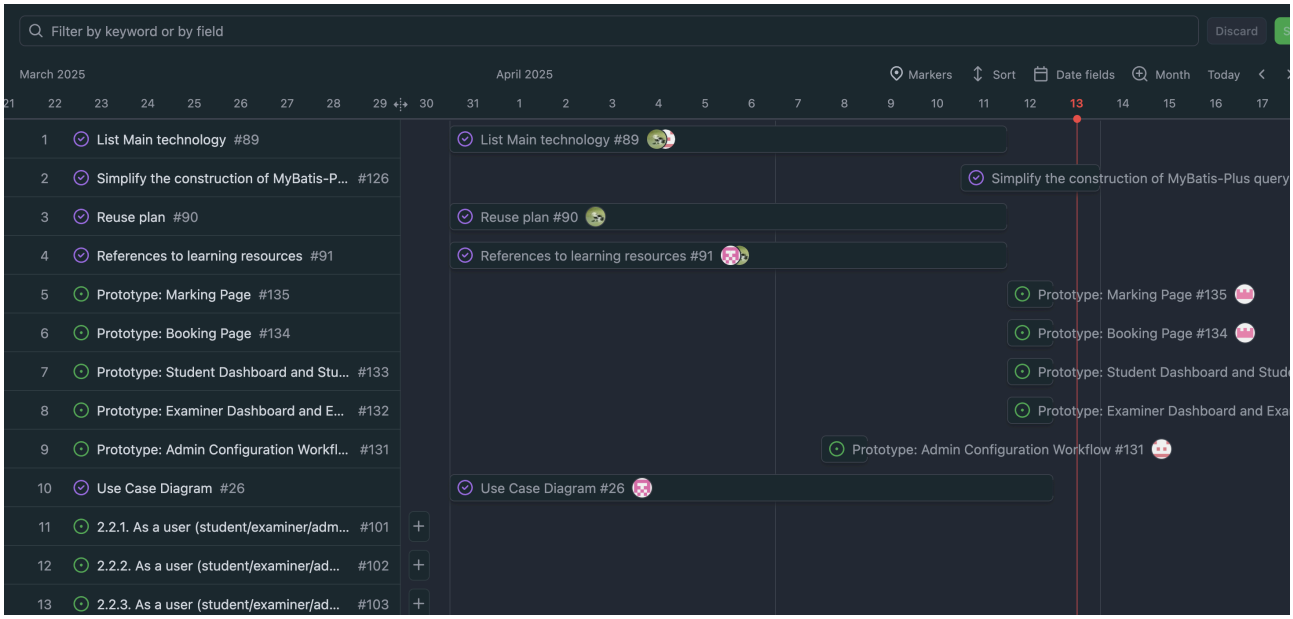

2. **Kanban Board Enhancement**:

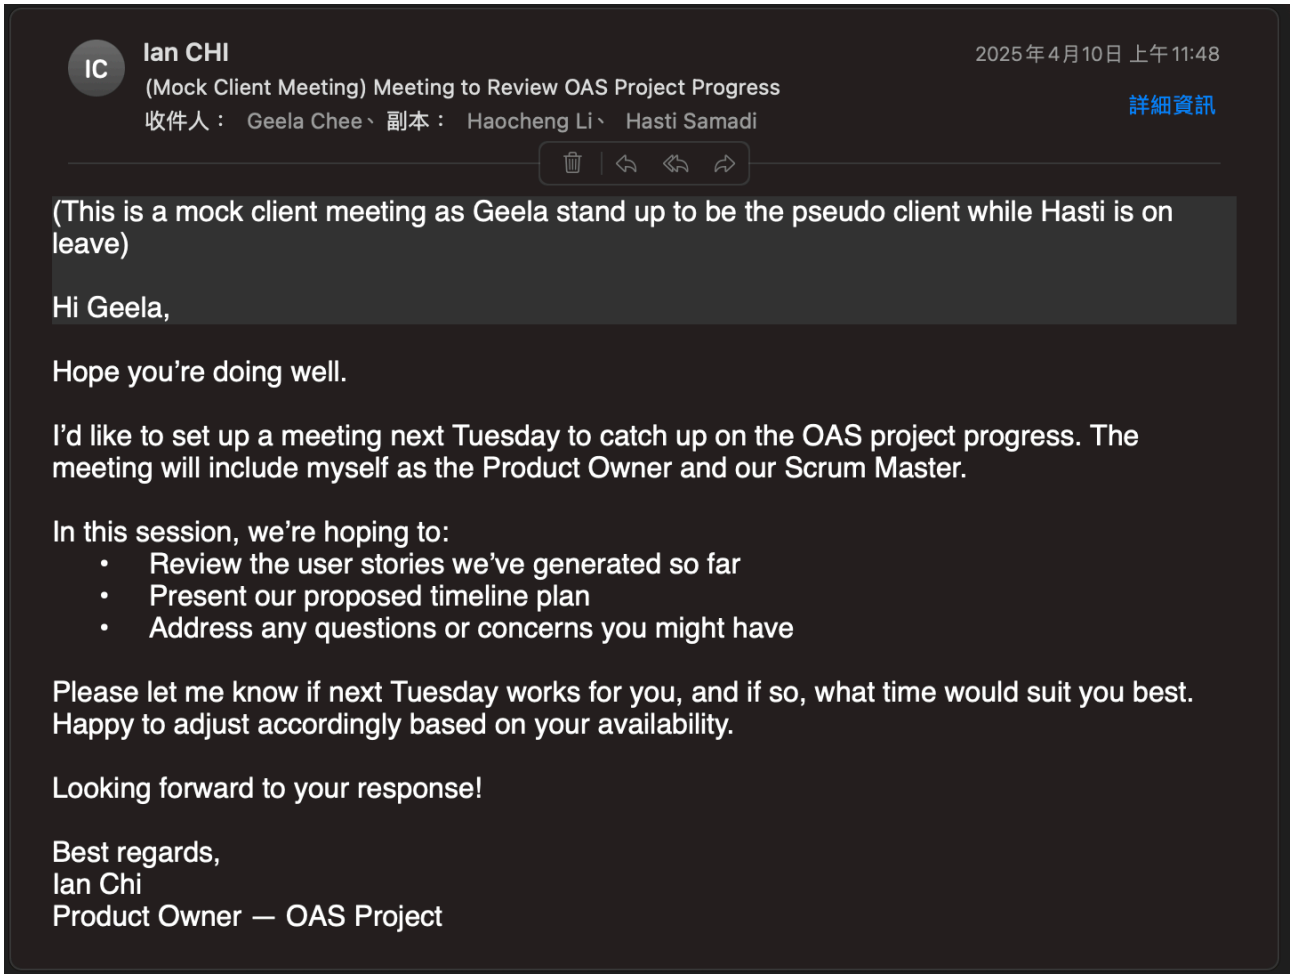

3. **Timeline Configuration**:

4. **Client Communication**:

Ian CHI
(Mock Client Meeting) Meeting to Review OAS Project Progress
收件人： Geela Chee、副本： Haocheng Li、 Hasti Samadi

詳細資訊

(This is a mock client meeting as Geela stand up to be the pseudo client while Hasti is on leave)

Hi Geela,

Hope you're doing well.

I'd like to set up a meeting next Tuesday to catch up on the OAS project progress. The meeting will include myself as the Product Owner and our Scrum Master.

In this session, we're hoping to:

- Review the user stories we've generated so far
- Present our proposed timeline plan
- Address any questions or concerns you might have

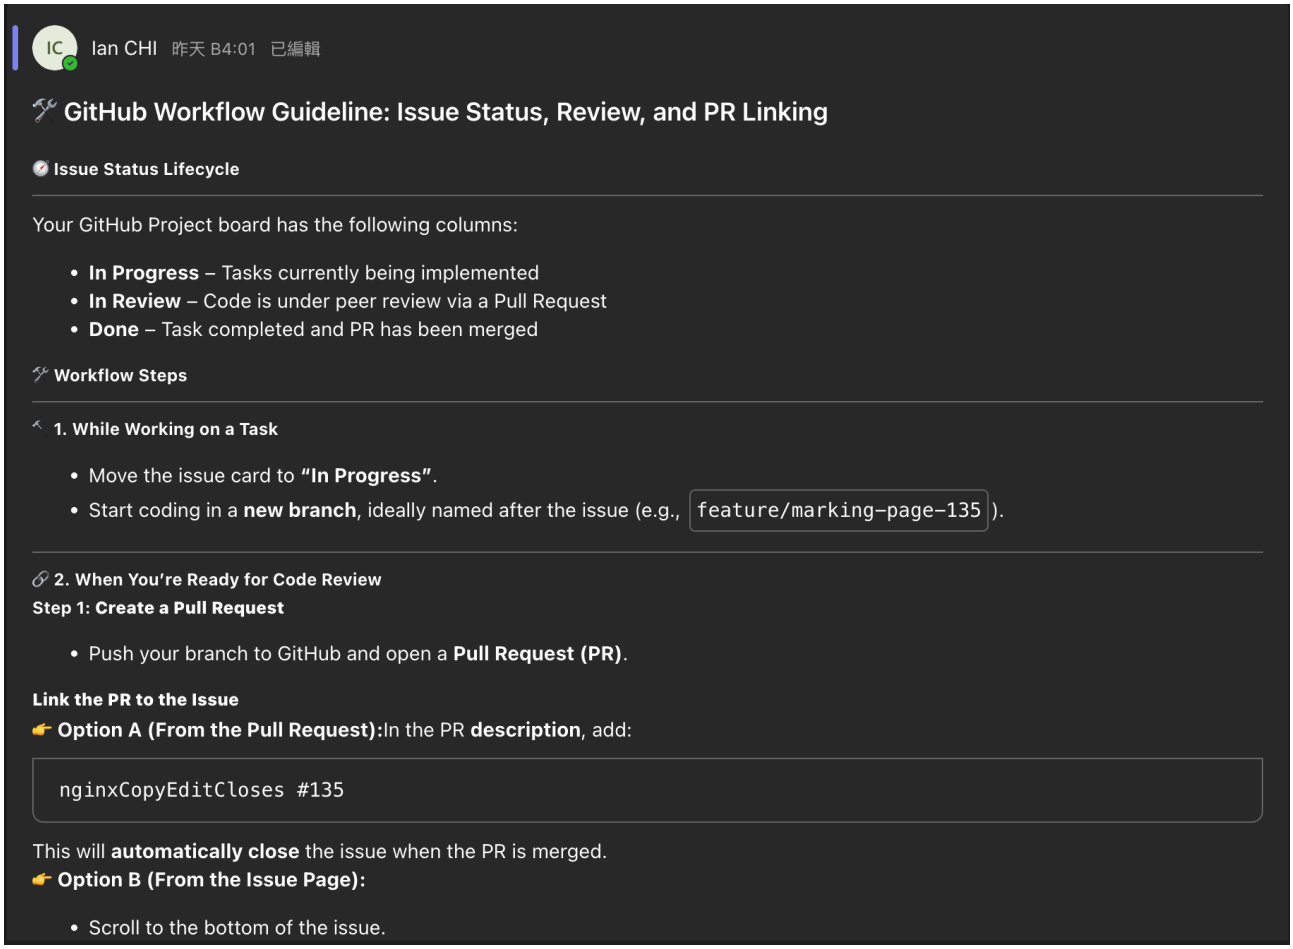

Please let me know if next Tuesday works for you, and if so, what time would suit you best. Happy to adjust accordingly based on your availability.

Looking forward to your response!

Best regards,
Ian Chi
Product Owner — OAS Project

5. **Workflow Documentation**:

[Ian CHI: 🛠️ GitHub Workflow Guideline: Issue Status, Review, and PR Linking]

🛠️ GitHub Workflow Guideline: Issue Status, Review, and PR Linking

🧭 Issue Status Lifecycle

Your GitHub Project board has the following columns:

- **In Progress** – Tasks currently being implemented
- **In Review** – Code is under peer review via a Pull Request
- **Done** – Task completed and PR has been merged

🛠️ Workflow Steps

🔨 1. While Working on a Task

- Move the issue card to **"In Progress"**.
- Start coding in a **new branch**, ideally named after the issue (e.g., `feature/marking-page-135`).

🔗 2. When You're Ready for Code Review

Step 1: Create a Pull Request

- Push your branch to GitHub and open a **Pull Request (PR)**.

Link the PR to the Issue

👉 **Option A (From the Pull Request):** In the PR **description**, add:

```
nginxCopyEditCloses #135
```

This will **automatically close** the issue when the PR is merged.

👉 **Option B (From the Issue Page):**

- Scroll to the bottom of the issue.

👉 **Option B (From the Issue Page):**

- Scroll to the bottom of the issue.
- Click **"Link Pull Request"**.
- Choose your PR.

🔍 **3. Submit for Review**

- Move the issue card to **"In Review"**.
- Assign **one or more team members** as reviewers in the PR.

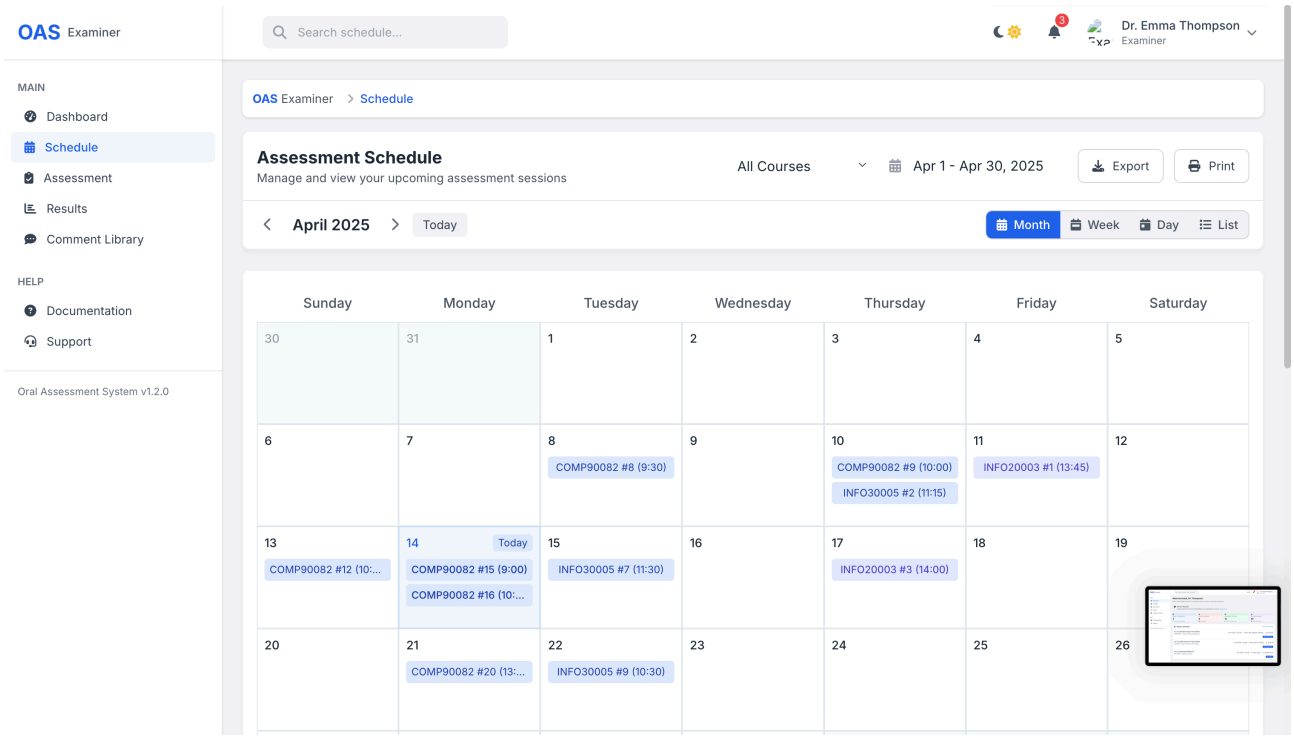

✅ **4. After Review is Approved (for reviewer)**

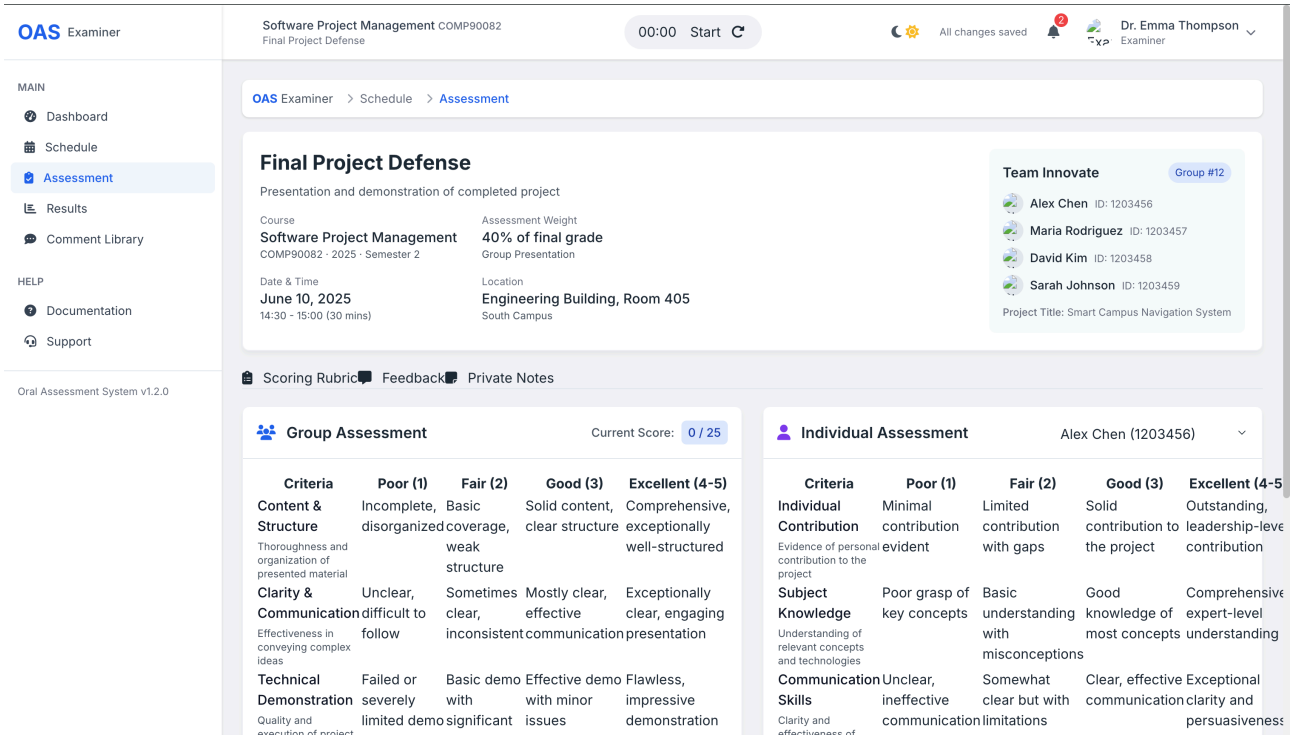

- If **no changes are needed**, the reviewer **approves and merges** the PR.
- Record the **end date** in the issue.
- Move the issue card to the **"Done"** column.
