Yongchun Li - Week 11 Report (*1378156*)

1. Tasks Accomplished This Week

1. Participated in the weekly team retro & next - week planning (2 h)
2. Implemented Password Reset Functionality for User Story 2.3 (6h) see Commit Link (Not at pull request stage yet)
   (1) Database Schema Enhancement:
   1. Added email field to sys_user table to support reliable email communication for all user types (students, examiners, administrators)
   2. Created password_reset_token table with proper token management, expiration handling, and usage tracking
   3. Updated test data to include realistic email addresses for different user roles
   (2) Backend Service Implementation:
   4. Enhanced SysUser entity and related mappers to support email field operations
   5. Implemented requestPasswordReset() and resetPassword() methods in SysUserServiceImpl with secure token generation and validation
   6. Created PasswordResetToken entity and mapper for token lifecycle management
   7. Extended EmailService to support password reset email notifications
   (3) API Development:
   8. Created PasswordResetController with RESTful endpoints
   - `POST /api/password-reset/request` - initiates password reset process
   - `POST /api/password-reset/change` - completes password reset with token validation
   9. Implemented comprehensive DTO classes (Reset PasswordRequest DTO, Change Password Request DTO) with proper validation
   10. Added appropriate error handling with custom error codes (USER_NOT_FOUND, INVALID_RESET_TOKEN)

   (4) Email System Optimization:
   11. Resolved email delivery issues by implementing sisLoginId-based email address generation, prioritizing Canvas login IDs over student numbers for more reliable email delivery
   12. Updated StudentServiceImpl to use proper email addresses during user invitation process
   13. Enhanced EmailServiceImpl to retrieve user email addresses from database rather than constructing them from student numbers
3. Prepare for presentation slides, responsible for latter steps part(1.5h)

2. Key Issues Encountered

Team has different aesthetic orientations, and the preliminary aggregated PPT effect has a large space for further integration and optimization.

3. Plan for Week 12

- ✧ Continue developing of Epic 1, 2, 9
- ✧ Attend presentation and support the presenting group.
