Weekly Report - Week 3

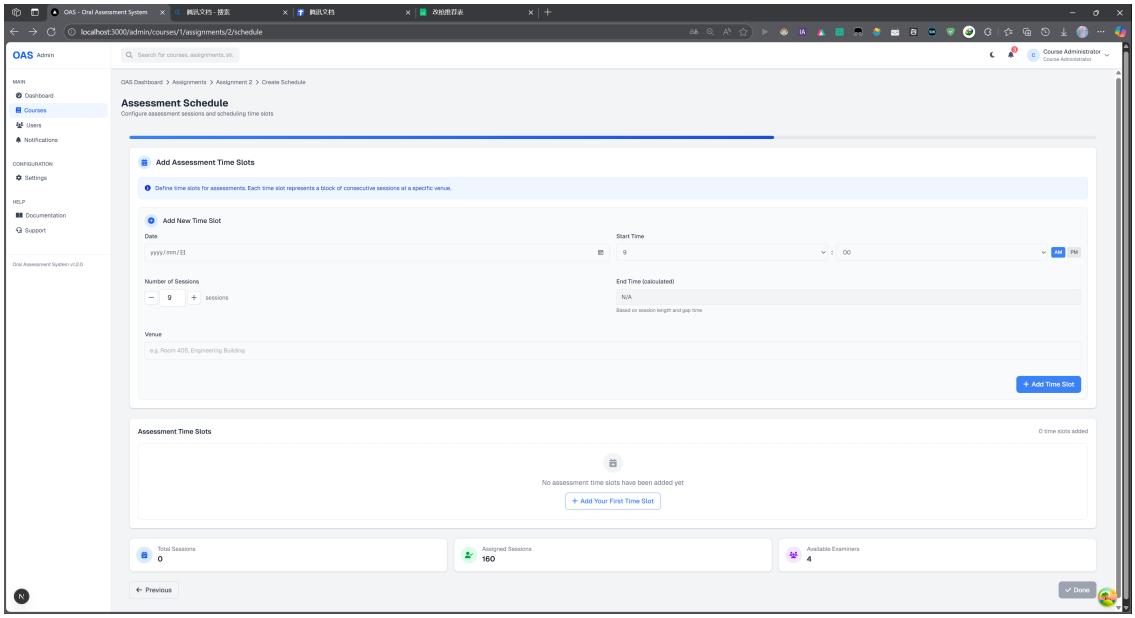

Name: Yukun Fu
Date: August 17, 2025

Tasks Completed This Week

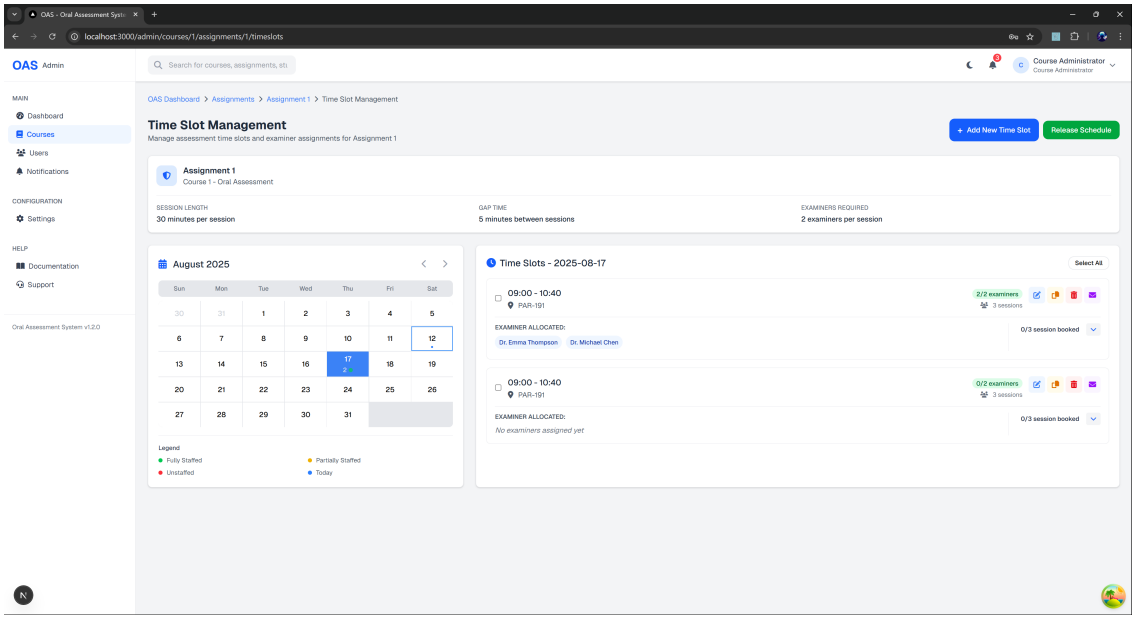

- **Frontend Page Development:**

  Github link: [SWEN90017-2025-SM1/OAS-web-based-oral-assessments at frontend-courseadmin-timeslot]

  - Developed Schedule page for assessment time slot setup with session configuration

  - Developed Timeslots management page with calendar view and slot management features

  - Created reusable modal components for adding/editing time slots

- **Routing & Navigation:**

  - Implemented nested dynamic routing: `/admin/courses/[courseId]/assignments/[assignmentId]/schedule|timeslots`

    - Updated navigation links in assignment components
    - Added proper breadcrumb navigation flow
- **UI Implementation:**
    - Applied scoped CSS styling with responsive design
    - Built interactive calendar component with date selection
    - Created time slot cards with action buttons (edit, duplicate, delete)
    - Implemented form validation and user feedback
- **Component Integration:**
    - Established seamless navigation flow from schedule setup to timeslots management
    - Implemented modal state management and data flow
    - Added mock data structures for development testing

Time allocated: 12 hours (2h analysis, 6h development, 2h routing, 2h styling/debugging)

Key Issues Encountered

1. **CSS Scoping Conflicts:** Resolved CSS conflicts affecting other pages by implementing scoped styling approach.
2. **Date Format Inconsistency:** Fixed date format mismatch between modal input and page state.
3. **Dynamic Routing:** Handled complex nested routing with proper parameter extraction.

Plan for Next Week

- **Backend Integration:**
    - Complete API documentation for schedule and timeslots endpoints
    - Set up API service layer with authentication and error handling
    - Replace mock data with real backend calls
- **Enhancement & Testing:**
    - Implement proper state management for data flows
    - Add unit tests for components
    - Optimize performance and accessibility
    - Cross-browser testing and refinements
