Week 6 Report

Tianyun Lei 1454701

What I Did This Week

- Connected CSV import functionality to backend APIs
- Updated assignment creation to support automatic CSV upload after assignment is created
- Fixed CSV error handling to properly display "Error Format" for format validation errors
- Modified datetime input field spacing in assignment creation forms

  github: https://github.com/SWEN90017-2025-SM1/OAS-web-based-oral-assessments/tree/connect-csv

Problems Encountered

- Complex error object structures from different API layers made CSV format error detection challenging
- Had to debug actual API response structure to implement proper error handling

Plans for Next Week

- Continue implementing frontend features for student part
- Address any additional UI improvements based on testing feedback
