Benyuan Wang - Week 6 Report

Benyuan Wang, 1492846

1. Tasks Accomplished This Week

- Continuously tested the implementation and fixes of both frontend and backend features, and reported persisting and newly emerging bugs.(15 hours)
- Participated in client meetings, mentor meetings, and team meetings to clarify upcoming tasks and discuss a new implementation approach for the time slot feature.(4 hours)
- Cleaned and updated database records in a timely manner to support frontend–backend integration and to prevent issues during client presentations.(2 hours)
- Developed automated test scripts, but due to frequent API updates, the scripts required constant changes and lacked general applicability. (5 hours) commit

2. Key Issues Encountered

- None.

3. Plan for Week 7

- Conduct testing on fixes for the presentation issues identified during the client meeting.
- Test and discuss the new time slot implementation approach.
- Perform API testing for Epics 3 and 6.
