Yunpeng Xiong Weekly Report (Semester 2, Week 7)

> Yunpeng Xiong 1513076

Q1

> What you have done for the project during the week and what you have achieved/delivered individually?

- What I've done for the project during the week:
  - Attending weekly mentor and team meetings. (~2 hours)
  - Monitor backend members on their allocated use cases (~4 hours)
  - Attend two required Endeavor workshops (~4 hours)
  - Finish our Endeavor Risk Assessment Form (~2 hours):

THE UNIVERSITY OF MELBOURNE

HEALTH & SAFETY
ENDEAVOUR RISK ASSESSMENT FORM

Ra No.ERMS Ref:	Date: 14/9/2025	Version No.: 1	Review Date:	Authorised by:

STEP 1 – ENTER INFORMATION ABOUT THE ACTIVITY/TASK, ITS LOCATION AND THE PEOPLE COMPLETING THE RISK ASSESSMENT

Location name:	Building No.:	Room No.:	Assessed by:	HSR/Employee representative:
South Lawn	N/A	N/A	Ian Chi, Haocheng Li, Yun Chen, Xiang Wang, Dongqiao He, Yongchun Li, Yanqing Shi, Yukun Fu, Tianyun Lei, Benyuan Wang, Weiran Xu	Yunpeng Xiong

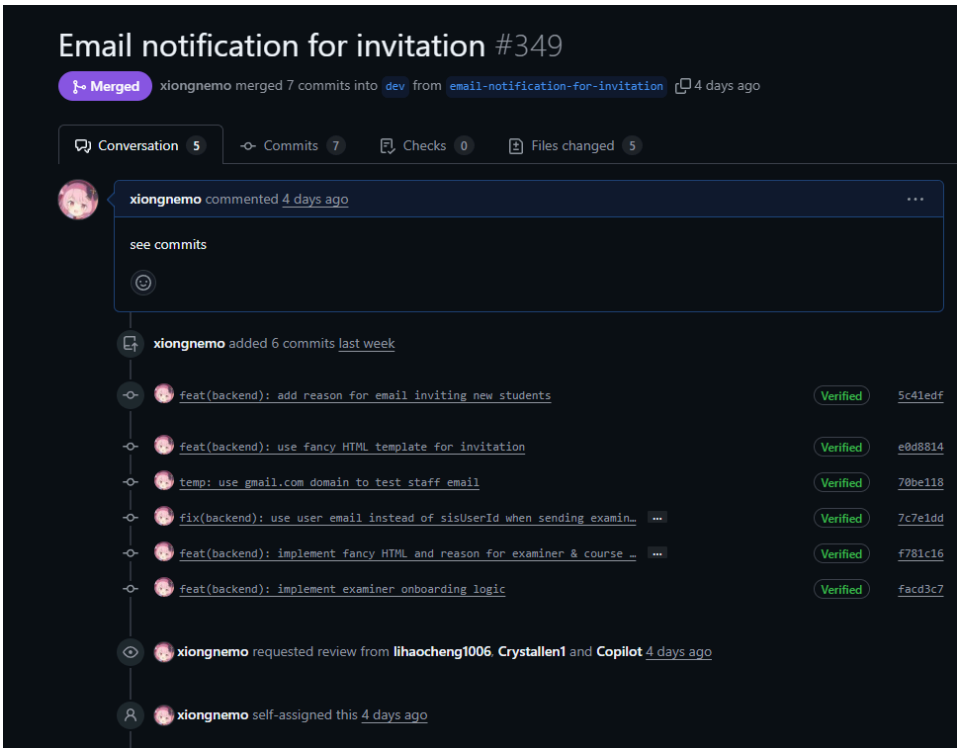

Description of activity/task:
Endeavour Exhibition Semester 2 2025 – SWEN90018 OAS Team Demonstration:
Our project will be displayed on two laptops connected to monitors at the booth during the exhibition. Visitors will be able to view and interact with our application under supervision.

Workplace conditions (Describe layout and physical conditions - including access and egress)
The exhibition will be held outdoors on South Lawn. Two laptops and monitors will be placed on the provided trestle table. Power will be supplied via tagged and tested extension leads and chargers. Cables will be secured to avoid trip hazards, and equipment will be kept under cover to reduce exposure to rain or wind. Clear access and egress will be maintained around the booth.

List systems of work for the activity/task:	
• Training/Inductions • SOPs • Emergency processes • Inspections to be completed • Existing controls	Team members will follow University training/inductions and standard operating procedures for safe computer use. Existing controls include safe cabling practices (cords secured to prevent trip hazards), use of tagged and tested equipment, and compliance with venue emergency processes. A brief inspection of the setup will be completed to ensure cables are secured and exits remain unobstructed.
Is there past experience with the activity/task that may assist in the assessment? • Existing controls • Industry standards • Training / Induction • Codes of Practice • SOPs • Incidents & near-misses • Incident Investigation • Standards • Legislation • Guidance material	Yes – previous Endeavour exhibitions and similar IT demonstrations have used standard computer setups without incident. Existing controls, safe work practices, and University OHS guidelines (including electrical safety standards, SOPs, and induction processes) are in place. Team members are familiar with event safety briefings and guidance material, which will assist in ensuring a safe demonstration environment.

- Individually...
  - Implement backend features:
    - Merged on `dev`: implemented fancy HTML email notification for invitation & Examiner onboarding. (~ 8 hours)
      - https://github.com/SWEN90017-2025-SM1/OAS-web-based-oral-assessments/pull/349

See the PR's comment (https://github.com/SWEN90017-2025-SM1/OAS-web-based-oral-assessments/pull/349#issuecomment-3266732077) for the screenshots.

- Manage GitHub:
  - Manage weekly report (~1 hour)
  - Review PRs (~2 hours)

Q2

> List 2-3 key issues you may have encountered and give reasons if applicable.

- Nope.

Q3

> What you plan to do for the project next week individually?

- I plan to do the following for the project next week:
  - Finish profile page backend part .
  - Continue to co-operate with frontend leader & product team to get a better view of the product flow itself.
  - Continuous technical support for the whole team.
