# OAS — Oral Assessment System

Project Code: SWEN90018-OAS | Booth 21

## Streamlining the entire oral exam lifecycle for universities

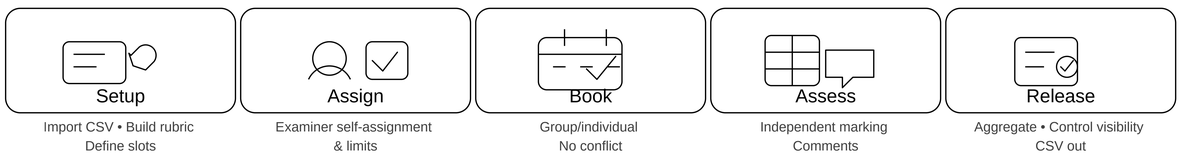

Next.js · React · Tailwind · Spring Boot · MySQL · Canvas CSV · JWT

## Why it matters?

Oral exams are vital but fragile: manual spreadsheets, clashing schedules, inconsistent feedback, and error-prone mark collation slow everything down for staff and students alike.

**Setup → Assign → Book → Assess → Release**

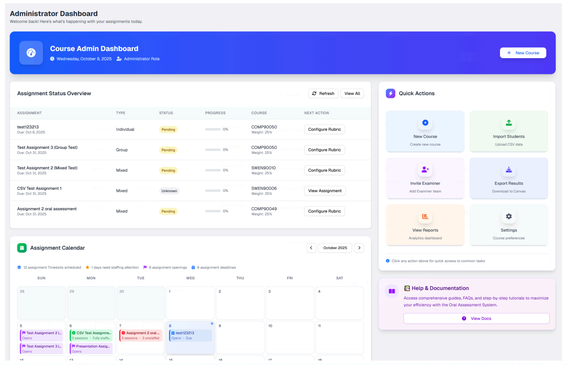

Single platform that automates the oral exam lifecycle

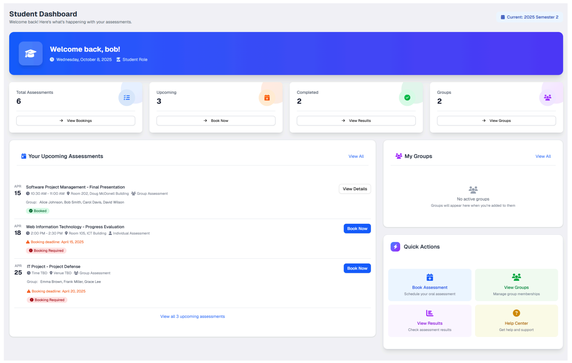

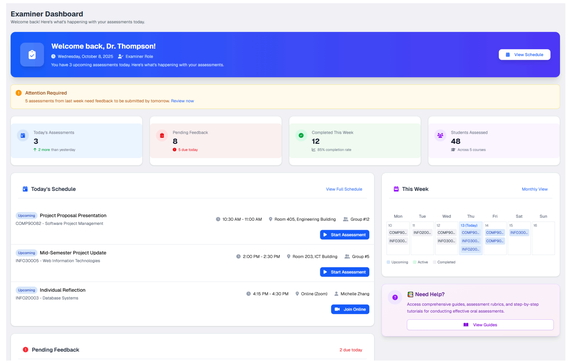

## What we've built?

A single web platform that automates Setup → Assign → Book → Assess → Release for oral assessments.

- CSV in/out (Canvas-ready): import participants and export final marks & feedback.
- Scheduling & booking: conflict-free slots; examiner self-assignment; student/group booking with reschedule rules.
- Independent marking: clean rubric UI; predefined comments + add-as-you-go libraries.
- Smart aggregation: per-assignment rules (average / max / min; group + individual mix).
- One-click release: control visibility; students see results when you decide.
- Reports: scheduling overview, mark breakdown, examiner trends.
- Book a slot → conflict-free
- Mark independently → add comments
- Switch aggregation → release in one click

## Architecture & Integration

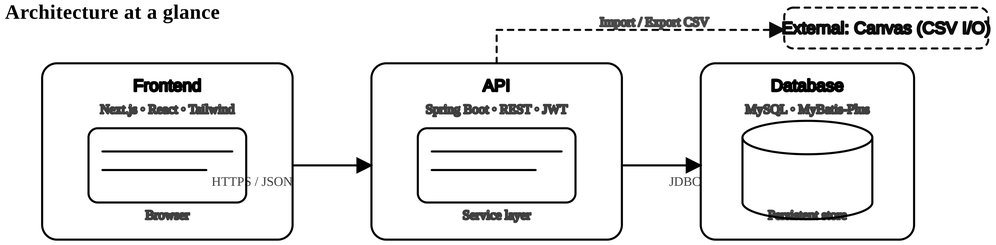

### Impact (projected)

**−90%**
manual admin steps
replaced by automated flows

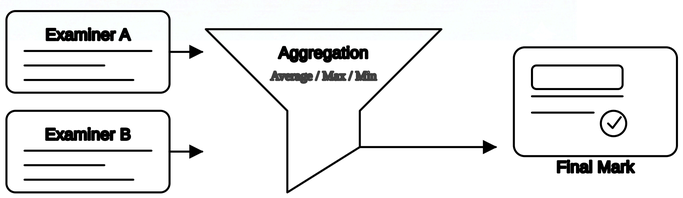

**−50%**
examiner time per session
streamlined rubric & comments

**Fewer errors**
rule-based aggregation & CSV validation

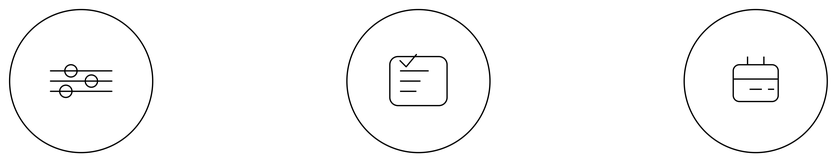

**Architecture at a glance**

**Multiple Examiners → Aggregation Rule → Final Mark**

**Who benefits**

🎓 Discipline & Supervision
Discipline: Master of Software Engineering
Supervisor: Geela Chee
👥 Team Members
Product Team
- Ian Chi — Product Owner

Architecture & DevOps Team
- Haocheng Li — Scrum Master, Frontend Lead
- Yunpeng Xiong — DevOps & Backend Lead

Backend Development
- Dongqiao He — Backend Developer
- Yongchun Li — Backend Developer
- Yun Chen — Backend Developer
- Xiang Wang — Backend Developer

Frontend Development
- Haocheng Li — Frontend Lead
- Yanqing Shi — Frontend Developer
- Yukun Fu — Frontend Developer
- Tianyun Lei — Frontend Developer (Semester 2)

Testing
- Benyuan Wang — Testing Lead
- Weiran Xu — Testing Engineer
