Week 8 Report

Tianyun Lei 1454701

What I Did This Week

- Enhanced examiner API layer with production-quality request cancellation support using AbortController (2 hours)
- Standardized error handling across all examiner services (Results, Assessment, Schedule) (1 hours)
- Implemented intelligent caching strategies (5-10min staleTime) to optimize data fetching performance (1 hours)
- Updated React Query hooks to leverage automatic request cancellation on component unmount (30 minutes)
- Fixed small UI bugs (1 hours)

GitHub: https://github.com/SWEN90017-2025-SM1/OAS-web-based-oral-assessments/tree/frontend-integration-results-fix

Problems Encountered

- Comment style inconsistencies required cleanup to maintain codebase standards
- Service method signature updates needed careful coordination to preserve existing functionality

Plans for Next Week

- Continue implementing remaining frontend features for other user roles
- Address any additional backend integration requirements based on testing feedback
