Weekly Report - Week 10

Name: Yukun Fu
Date: May 18, 2025

1. Tasks Completed This Week

- **Created a detailed student user flow diagrams**

- **Applied user flow designs to Figma prototype, enhancing interactive elements**

- **Participated in group meeting discussing client meeting preparation and final presentation**

Time allocated: Approximately 10 hours (4 hours student user flow diagram, 4 hours prototype implementation, 2 hours group meeting and discussions)

2. Key Issues Encountered

1. **User Flow Complexity Management:** Creating comprehensive user flows that accurately represent all student pathways (including both individual and group assessment scenarios) required careful planning to ensure clarity while maintaining completeness.
2. **Prototype Interaction Fidelity:** Determining the appropriate level of interaction detail in the prototype to effectively demonstrate functionality without over-committing development resources presented a challenge in balancing effort with demonstration value.

3. Plan for Next Week

- Optimize frontend prototype based on team feedback, with particular focus on visual consistency and responsive behavior
- Prepare slides and demonstration script for the final presentation, highlighting key frontend achievements and implementation decisions
- Support upcoming client meeting by preparing student interface demonstrations and documentation
