Week11 Report - Yun Chen

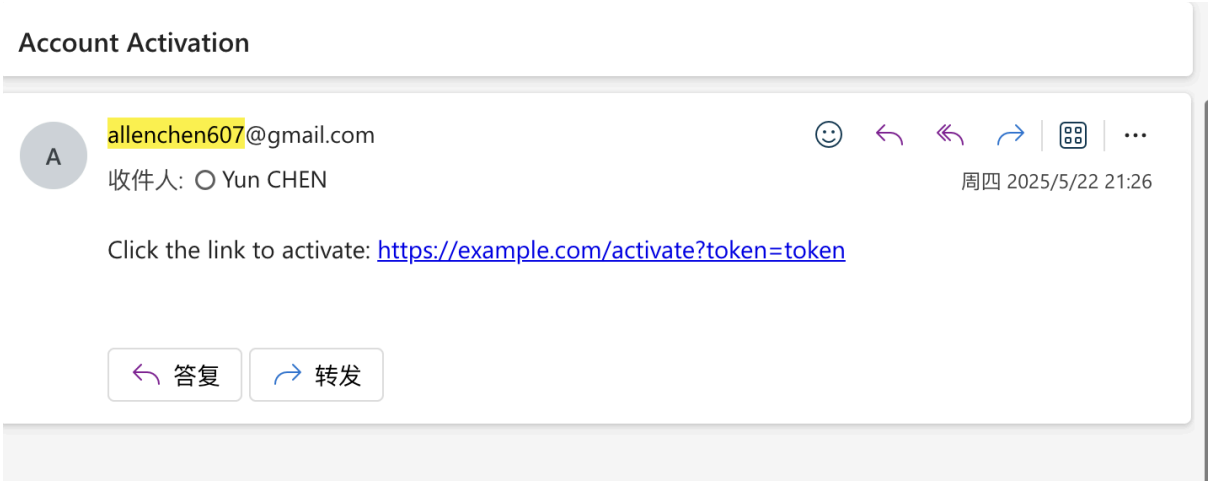

name: Yun Chen
student id: 1412174
Date: 25/5/2025

1. Work Completed

- Building upon last week's CSV import functionality, this week I implemented the full registration and activation workflow for student accounts. After the administrator uploads a student list via CSV, the system now automatically generates a secure activation token for each newly imported student who has not yet registered. These tokens are then stored in the database and used to construct personalized activation links.

  To notify students, I integrated ***JavaMailSender*** into the backend and configured it to send activation emails using a system mailbox (supporting both Gmail and Outlook). Each student receives a unique activation link, allowing them to complete their registration securely.(4h)

  Email recevied:

https://github.com/SWEN90017-2025-SM1/OAS-web-based-oral-assessments/pull/230/commits/47c6a365203adfd9e55e74683dabe2d9a27ce894

https://github.com/SWEN90017-2025-SM1/OAS-web-based-oral-assessments/pull/230/commits/eebeb303167dcd6216c2f2937e4fe96aaffbad52

- Attended group meetings to discuss team presentation (3h)

- prepare for slides of team presentation. Mainly responsible for the key challenge part, I summarize the representative challenges from each teammate's weekly report. (1h)

total 8h

2. Issues Encountered

There is still some confusion regarding the fields in the imported CSV file. I'm not entirely sure what each field represents, especially the one corresponding to the student's username — it's not yet clear which field that is.

3. Next Week Plan

- Finish PR#230. Solve new problems found after review.
- Clarify the meanings of each field in csv.
