1. Administrator: Sarah Chen

Role: Administrator (Subject Coordinator)

Age: 45

Location: Parkville, VIC

Occupation: Senior Teaching Fellow & Subject Coordinator

Archetype: Coordinator & Planner

Background

Sarah has been coordinating large undergraduate subjects at the University of Melbourne for over 10 years. She's responsible for the overall design, delivery, and administration of assessments within her subjects, including managing tutors (examiners) and ensuring smooth operations. She's proficient with Canvas but often finds herself bogged down with manual data entry and coordination tasks, especially for oral assessments which involve complex scheduling and rubric management. She's looking for a system to streamline these processes.

Goals

- **Efficient Setup:** Quickly and accurately set up subjects, assignments, and assessment parameters (slots, venues, rubrics) each semester. (Epic 4, 5)
- **Data Management:** Easily import student/group data from Canvas and export accurate marks/feedback back to Canvas. (Epic 1)
- **Standardization:** Create and manage consistent rubrics and pre-defined feedback comments to ensure fair and standardized marking across multiple examiners. (Epic 4)
- **Oversight & Control:** Monitor the booking process, manage examiner assignments, consolidate marks accurately, and control the release of results to students. (Epic 5, 6)
- **Troubleshooting:** Quickly identify and resolve any errors related to data import/export

or system configuration. (Epic 1)

- **Compliance:** Ensure the assessment process adheres to university policies regarding privacy and data security. (Epic 8)

Frustrations

- **Manual Data Handling:** Spends too much time manually formatting CSV files for import/export between systems.
- **Complex Scheduling:** Difficulty managing numerous time slots, venues, and examiner availabilities for oral assessments.
- **Inconsistent Marking:** Worries about variations in marking and feedback quality across different examiners.
- **Mark Consolidation Errors:** Prone to errors when manually calculating final marks, especially with complex rubrics involving group and individual components.
- **Lack of Centralization:** Juggling multiple spreadsheets and systems for scheduling, marking, and data management.
- **Error Resolution:** Frustrated when CSV uploads fail without clear error messages, making troubleshooting difficult.

Motivations

- **Efficiency:** Wants to reduce the administrative overhead associated with managing assessments.
- **Accuracy & Fairness:** Driven to ensure the marking process is consistent, fair, and grades are calculated correctly.
- **Improved Experience:** Aims to provide a smoother experience for both students (booking) and examiners (marking).
- **Data Integrity:** Needs confidence in the accuracy of data flowing into and out of the system and Canvas.
- **Compliance:** Committed to upholding university standards for security and privacy.

Personality

- **Organized:** Highly structured and methodical in her approach to work.
- **Detail-Oriented:** Pays close attention to accuracy in data and configuration.
- **Proactive:** Looks for ways to improve processes and prevent issues.

- **Pragmatic:** Focuses on practical solutions that work effectively.
- **Slightly Overwhelmed:** Often juggling many administrative tasks and deadlines.

Skills

- University Administration Processes
- Curriculum and Assessment Design
- Proficiency with Canvas and Excel/CSV
- Coordination and Communication

Favorite Tools/Brands

- **Canvas LMS:** Central platform for course delivery.
- **Microsoft Excel/Google Sheets:** For data manipulation and tracking.
- **University of Melbourne Systems:** Familiar with internal administrative tools.

Quote: *"I need a reliable system to manage the entire assessment lifecycle, from setup and scheduling to marking and exporting results, without the usual headaches."*

2. Examiner: Dr. Ben Carter

Role: Examiner (Sessional Tutor)

Age: 32

Location: Carlton, VIC

Occupation: PhD Candidate & Sessional Tutor

Archetype: Educator & Assessor

Background

Ben is a PhD candidate who tutors several tutorials for one of Sarah's large undergraduate subjects. Part of his role involves conducting and marking oral assessments. He's passionate about teaching and providing useful feedback but finds the marking process can be time-consuming and administratively heavy. He juggles his tutoring responsibilities with his own research and wants tools that help him assess students efficiently and fairly according to the subject's criteria.

Goals

- **Clear Schedule:** Easily view his assigned assessment slots, times, and locations. (Epic 3, 5)
- **Preparation:** Know which students/groups are booked for his slots in advance. (Epic 3)
- **Efficient Marking:** Use a straightforward interface to input marks against rubric criteria and provide structured feedback during or immediately after the assessment. (Epic 3)
- **Consistent Feedback:** Utilize pre-defined comments where appropriate to ensure consistency and save time, while still being able to add specific points. (Epic 3)
- **Accurate Recording:** Reliably save assessment progress and submit final marks/feedback for both individuals and groups. (Epic 3)
- **Independent Assessment:** Ensure his marking process is independent and not influenced by other examiners. (Epic 3)
- **Workload Management:** Assign himself to suitable assessment slots and get reminders for upcoming sessions. (Epic 5, 7)

Frustrations

- **Clunky Interfaces:** Dislikes assessment tools that require excessive clicking or page navigation.
- **Time Pressure:** Feels pressured to provide detailed feedback quickly during or between assessment slots.
- **Remembering Criteria:** Keeping complex rubric criteria in mind while assessing can be challenging.
- **Inconsistent Tools:** Dealing with different marking methods or spreadsheets across different subjects.
- **Scheduling:** Difficulty managing his availability and assignments across different responsibilities.
- **Data Loss:** Worries about losing marks or feedback if a system isn't reliable with saving

progress.

Motivations

- **Student Learning:** Wants to provide feedback that helps students improve.
- **Fair Evaluation:** Committed to assessing students accurately and consistently based on the defined rubric.
- **Efficiency:** Needs to complete his marking duties effectively to balance with his PhD research.
- **Clarity:** Appreciates clear instructions, schedules, and marking criteria.

Personality

- **Dedicated:** Committed to his teaching responsibilities and students' learning.
- **Analytical:** Approaches assessment methodically based on criteria.
- **Time-Conscious:** Aware of the need to manage his time effectively.
- **Constructive:** Aims to provide helpful, actionable feedback.
- **Seeks Simplicity:** Prefers tools that are intuitive and easy to use.

Skills

- Subject Matter Expertise
- Assessment and Feedback Provision
- Communication Skills
- Time Management

Favorite Tools/Brands

- **Canvas LMS:** For accessing subject materials and student lists.
- **Reference Management Software (e.g., Zotero):** For his research.
- **Video Conferencing (e.g., Zoom):** If assessments involve remote components.

Quote: *"Give me a simple, reliable interface where I can focus on assessing the student, applying the rubric, and giving feedback efficiently."*

3. Student: Chloe Nguyen

Role: Student (Undergraduate)

Age: 20

Location: Melbourne CBD, VIC

Occupation: 2nd Year Bachelor of Science Student

Archetype: Learner & Achiever

Background

Chloe is a diligent undergraduate student juggling a full course load. She takes subjects that involve both individual and group oral assessments. She relies heavily on Canvas and university systems for information and managing her studies. She wants the assessment process, particularly booking slots and accessing results, to be straightforward and clear. She values feedback to understand how she can improve. For group assignments, coordinating with her team members for booking is an added complexity.

Goals

- **Easy Access:** Create an account and log in to the system securely and easily. (Epic 2)
- **Clear Information:** View available assessment time slots, venues, and her group members (if applicable) clearly. (Epic 5)
- **Convenient Booking:** Book a suitable assessment slot for herself or her group without hassle or concurrency issues. (Epic 5)
- **Flexibility:** Be able to reschedule a booking if necessary (within allowed timeframe). (Epic 5)
- **Confirmation & Reminders:** Receive confirmation of her booking and reminders before the assessment. (Epic 7)
- **Access Results:** View her final marks and feedback in a timely manner once released.

(Epic 6)

- **Privacy Awareness:** Understand how her assessment data is being used and stored. (Epic 8)

Frustrations

- **Booking Scramble:** Stressing about finding a suitable time slot, especially if availability is limited or systems are slow.
- **Group Coordination:** Difficulty coordinating with group members to decide on and book a single slot for everyone.
- **Lost Information:** Forgetting booked times/locations or missing important deadlines/reminders.
- **Unclear Feedback:** Receiving feedback that is vague or doesn't clearly relate to the marking criteria.
- **Delayed Results:** Waiting anxiously for marks and feedback to be released.
- **System Complexity:** Dealing with unintuitive or confusing interfaces for booking or accessing information.
- **Privacy Concerns:** Uncertainty about who sees her assessment data and feedback.

Motivations

- **Academic Success:** Wants to perform well in assessments and achieve good grades.
- **Learning & Improvement:** Values constructive feedback to understand her strengths and weaknesses.
- **Reduced Stress:** Prefers systems that are simple and reliable, minimizing assessment-related anxiety.
- **Fairness:** Expects the assessment and marking process to be equitable.
- **Efficiency:** Wants to manage her assessment scheduling quickly and easily.

Personality

- **Organized:** Tries to stay on top of deadlines and schedules.
- **Goal-Oriented:** Focused on achieving academic success.
- **Digitally Proficient:** Comfortable using online systems but prefers intuitive ones.
- **Slightly Anxious:** Can feel stressed about assessments and grades.

- **Values Clarity:** Appreciates clear instructions and timely communication.

Skills

- Using University LMS (Canvas) and IT systems
- Time management and organization
- Collaboration (for group work)
- Subject-specific knowledge and presentation skills

Favorite Tools/Brands

- **Canvas LMS:** Primary source for course information.
- **Google Calendar/University Timetable:** For scheduling.
- **Messaging Apps (e.g., Messenger, Discord):** For group coordination.
- **University Email:** For official communications.

Quote: *"I need a straightforward way to book my oral assessment and access my results and feedback without any fuss."*
