Yunpeng Xiong Weekly Report (Semester 2, Week 11)

> Yunpeng Xiong 1513076

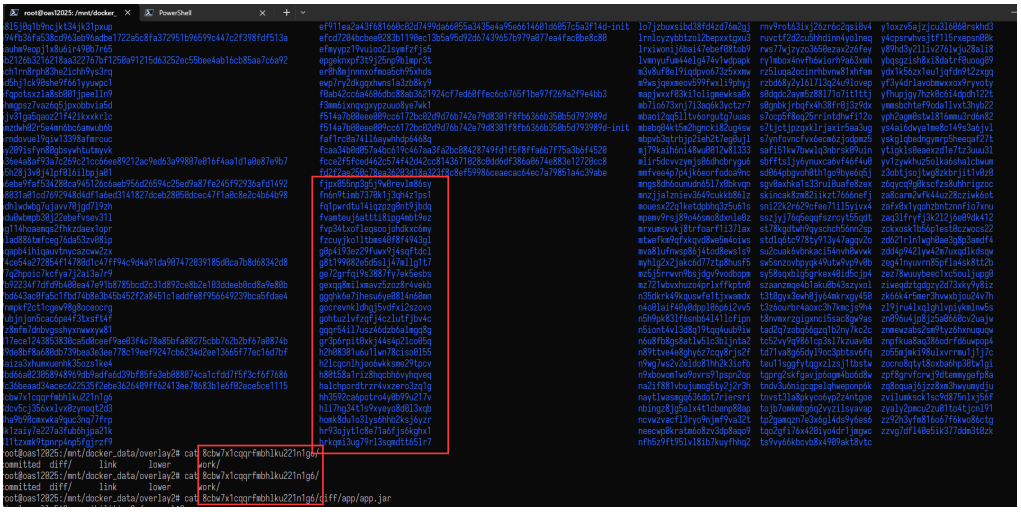

Q1

> What you have done for the project during the week and what you have achieved/delivered individually?

- What I've done for the project during the week:
  - Attending weekly mentor and team meetings. (~2 hours)
  - Attend client meeting (~1 hour)
  - Allocate the team to our Endeavor timeslots. (~1 hour)
- Individually...
  - Investigate and resolve a problem that hinders our deployment pipeline from building. (~6 hours)
    - On Monday midnight, our Jenkins was blocked due to insufficient disk space:

    - But I can confirm I've moved our data on Week 3 to the 100 GB mount point the University has provided to us. So then I began to dig into what we have now:

    - There's numerous `app.jar` under these subfolders in `overlay2` folder, but the naming of these subfolders are not the typical `overlay2` format.
    - After some research into docker document, I found out they are actually the build cache of the Docker System which can be removed by:

```
docker system prune --all --volumes --force
```

The following screenshots show what happened before and after I executed this command.

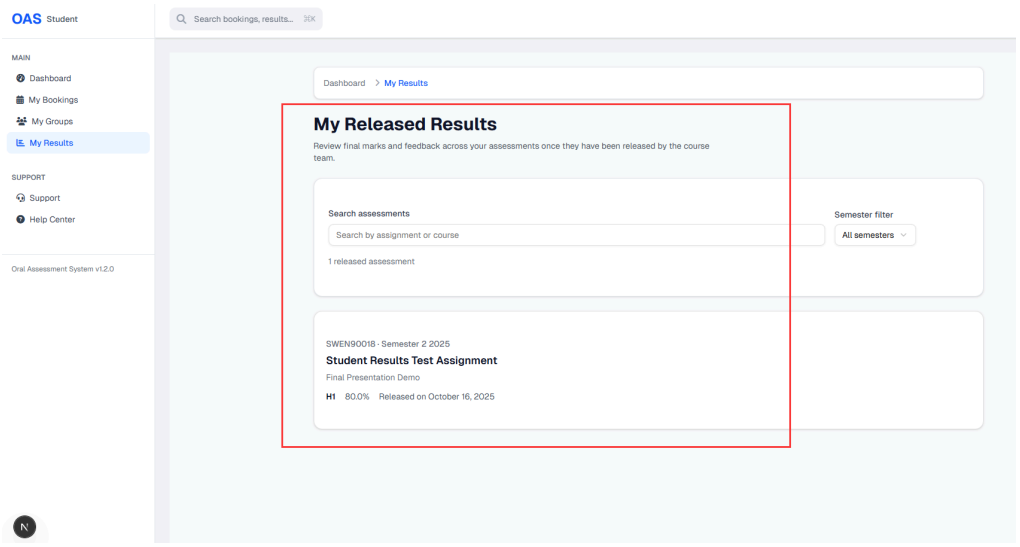

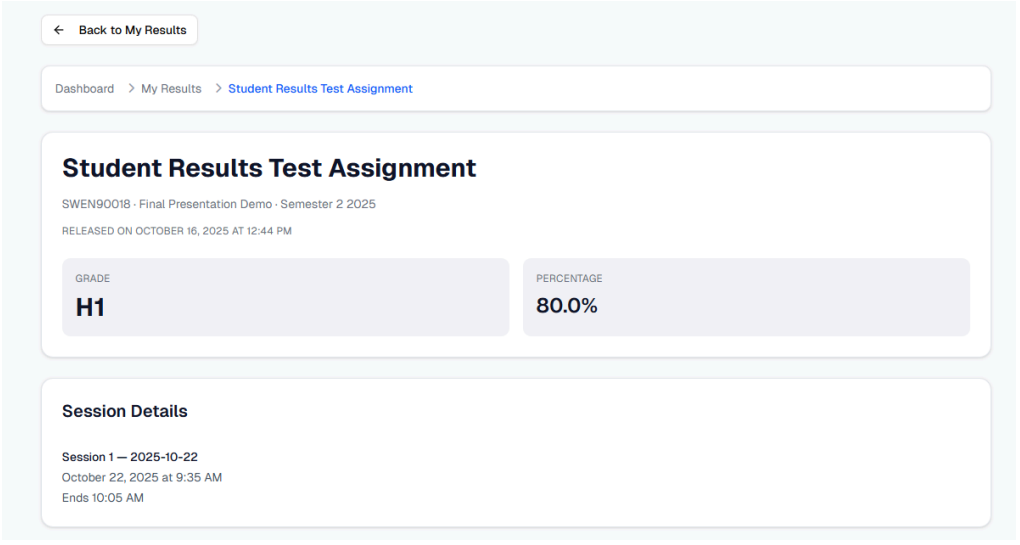

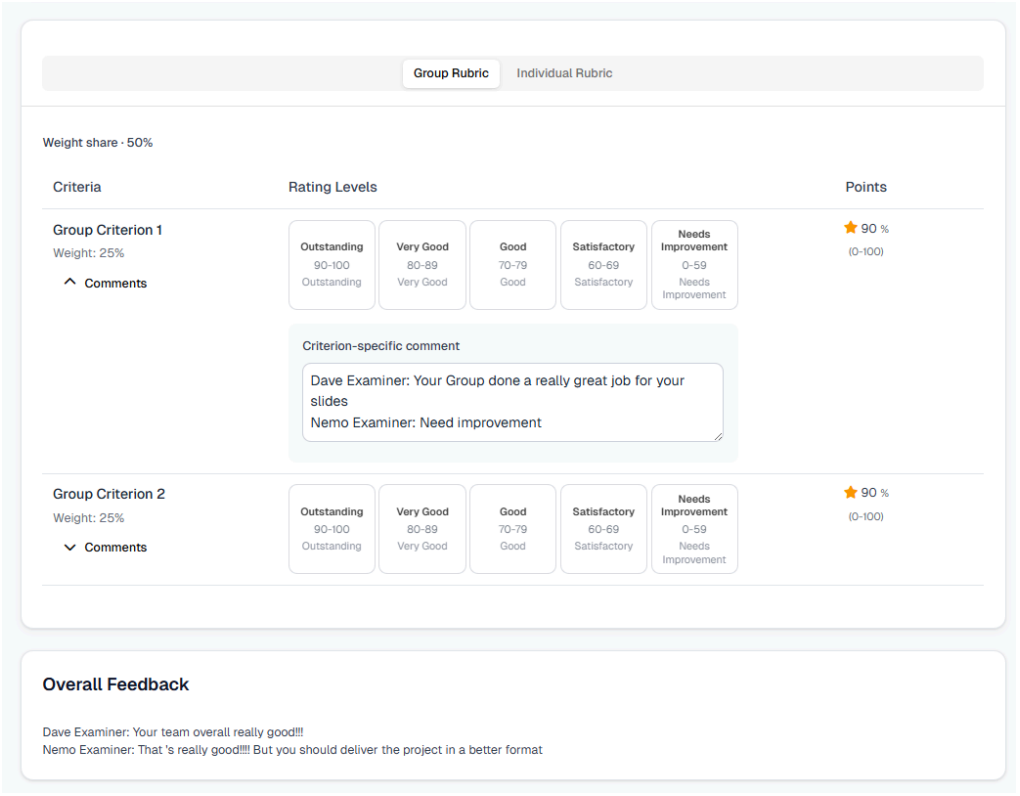

- Implement Student Results (~8 hours)

- Commit: https://github.com/SWEN90017-2025-SM1/OAS-web-based-oral-assessments/commit/0347e4e90f5d8d3f29a745027c0cbe319f30d00e
- Screenshots:

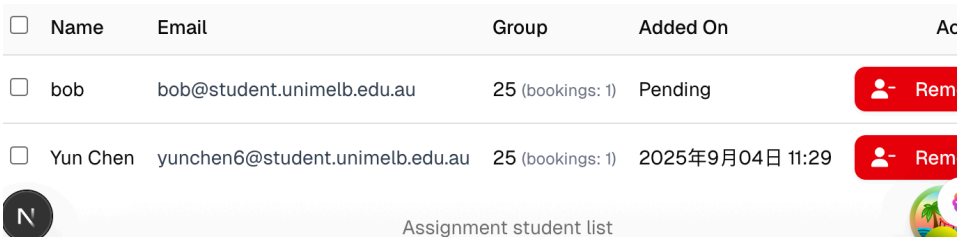

- fix: Add group name to assignment member responses (~3 hours)

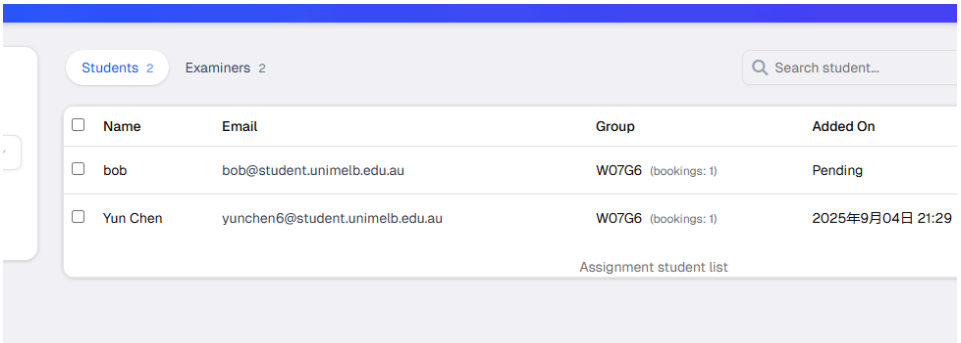

- Commit: https://github.com/SWEN90017-2025-SM1/OAS-web-based-oral-assessments/commit/effb85c9d05ac151e36152e5f222496bc3baee0c
- Screenshot:
  - Before:

```
"total": 2,
"data": [
    {

```

Q2

> List 2-3 key issues you may have encountered and give reasons if applicable.

- Nope.

Q3

> What you plan to do for the project next week individually?

- I plan to do the following for the project next week:
    - Attend Endeavor Exhibition.
    - Continuous technical support for the whole team.
