Week11&12 Report - Yun Chen

name: Yun Chen
student id: 1412174
Date: 26/10/2025

1. Week 11 Work Completed

fix bugs for endeavor:

1. Unified Rubric Format Integration

- Introduced `rubricMetaSnapshot` as the unified rubric metadata source, deprecating `rubricsInfoSnapshot`.
- Updated `AssessmentServiceImpl` for rubric extraction based on subject type.
- Ensured backward compatibility with legacy rubric data.
  https://github.com/SWEN90017-2025-SM1/OAS-web-based-oral-assessments/commit/727814eeea27919a7f3817bc3d946fe318e25571
  https://github.com/SWEN90017-2025-SM1/OAS-web-based-oral-assessments/commit/f0cc9be8600a280296053cbf0bfdf7bbd7578a23

2. Rubric Validation & Score Processing Refactor

- Refactored `normalizeAndValidateScores` and `computeTotalScore` to use the new `rubricMetaSnapshot`.
- Added enhanced validation for rubric inputs and scoring range.
- Deprecated outdated methods for cleaner logic and consistency.
  https://github.com/SWEN90017-2025-SM1/OAS-web-based-oral-assessments/commit/15bd34e7f62754508a887bece648340840f2e682

3. MIX Type Assessment Enhancements

- Refreshed rubric snapshots for MIX-type submissions to sync with updated assignment data
- Implemented **auto-submission** for related individual submissions linked to a MIX group submission.
- Enhanced score validation, individual feedback handling, and data consistency.

https://github.com/SWEN90017-2025-SM1/OAS-web-based-oral-assessments/commit/e79a3540072ff8ad26aa10017913ed773617f71a

4. Unified Score Structure & Enrollment Linking

- Updated `SaveAssessmentDraftRequestDTO` and `SubmitAssessmentRequestDTO` to support **unified scores array** for GROUP and INDIVIDUAL data.
- Deprecated `individualScores` field and added `enrollmentId` in `AssessmentSubmissionDTO`.
- Updated `AssessmentServiceImpl` to parse unified scores properly for MIX submissions.
  https://github.com/SWEN90017-2025-SM1/OAS-web-based-oral-assessments/commit/933a584a9f3072dd8a1b7a387ffa9dfc8f0fd06c

5. Rubric Validation Enhancement in AssignmentServiceImpl

- Introduced **optional total-weight checking** to allow flexible mixed rubric validation.
- Adjusted validation logic across service layers for proper integration.
  https://github.com/SWEN90017-2025-SM1/OAS-web-based-oral-assessments/commit/79c791c5353cb05fad15619c1b78dafa5499f227

6. Student-Assignment Linking Optimization

- Improved creation logic of `AssignmentParticipant` relations for pre-existing students.
- Enhanced email-based linking reliability and removed redundant logic.
  https://github.com/SWEN90017-2025-SM1/OAS-web-based-oral-assessments/commit/dc3e2c43a174142e49b72ef71d4537c5c6776141

7. Auto-Detection of Subject Type in Submissions

- Added logic to auto-detect subject type (`GROUP`, `INDIVIDUAL`, or `MIX`) based on assignment data.
- Improved flexibility for submission APIs by allowing nullable subject types in DTOs.

https://github.com/SWEN90017-2025-SM1/OAS-web-based-oral-assessments/commit/f03e7b298c8ce58d76667f2241822a3834fdf60c

8. MIX Submission Type Detection Refinement

- Implemented internal method to detect presence of individual scores in MIX submissions.
- Automatically sets submission type to `MIX` when applicable for improved consistency.
  https://github.com/SWEN90017-2025-SM1/OAS-web-based-oral-assessments/commit/1d5be33056a2f18a1a65440325be72b9d43a17f7

9. Enhanced Logging and Session Handling

- Added detailed submission state change logs for traceability.
- Updated session enrollment logic in `SessionServiceImpl` to support both GROUP and MIX types.
  https://github.com/SWEN90017-2025-SM1/OAS-web-based-oral-assessments/commit/afb2f81ca235d0a54bb7425238c5e61a269246b8

10. Enrollment ID Integration for Session-Based Submissions

- Implemented logic to query and set `enrollmentId` from `session_student` for all submission types.
- Adjusted GROUP/MIX handling for accurate enrollment linking.
  https://github.com/SWEN90017-2025-SM1/OAS-web-based-oral-assessments/commit/ad04cd5764bf4d1eaa9ddbf1b25190d58b0454f5

11. MIX Session Retrieval and Display Improvements

- Updated queries in `ProfileWidgetMapper` and `StudentTimeSlotServiceImpl` to include MIX bookings.
- Improved code documentation for session retrieval logic.
  https://github.com/SWEN90017-2025-SM1/OAS-web-based-oral-assessments/commit/96d2d918b133d530399d6e465e910f4f846e4b78

12. Comprehensive Assignment Deletion Logic

- Added cascading deletion for assignment-related sessions, examiners, students, and submissions.
- Improved data integrity and system consistency post-deletion.
  https://github.com/SWEN90017-2025-SM1/OAS-web-based-oral-assessments/commit/1a429b11b39d28d99374c5ade1217531d94c7d2c

13. Enrollment Priority and Backward Compatibility

- Refined enrollment retrieval logic to **prioritize MIX type** lookups, falling back to GROUP for legacy data.
- Enhanced data consistency for existing submissions.

  https://github.com/SWEN90017-2025-SM1/OAS-web-based-oral-assessments/commit/a9aeab8184cfa91fe62787c1e3fde6db24b05c85

14. Session Booking Validation

- Added mapper methods to verify if a student/group has already booked a session.
- Strengthened booking validation to prevent duplicate reservations.
  https://github.com/SWEN90017-2025-SM1/OAS-web-based-oral-assessments/commit/bd12bc2209fd0b774baaf1783a8cb74c217cdcd4

Total : 15h

2. Week 12 Work Completed

Add CSV export functionality for grades and teacher scoring details

- Implemented endpoints for exporting individual and group grades as CSV files.
- Added support for exporting teacher scoring details in CSV format.
- Introduced new DTOs: GroupGradeExportDTO, IndividualGradeExportDTO, and TeacherScoringDetailExportDTO.
- Created corresponding CSV handlers for exporting grade data.
- Enhanced CsvController with new export methods and error handling.

https://github.com/SWEN90017-2025-SM1/OAS-web-based-oral-assessments/commit/ab318d509faf7fc0966b46535944f5556f82c640
