Week 5 Report — Yongchun Li (1378156)

Completed

- Bug fix for Epic 4: submitted and iterated on PR #322, addressing defects and contract gaps across layers.
  - Link: https://github.com/SWEN90017-2025-SM1/OAS-web-based-oral-assessments/pull/322
  - Although my primary scope is backend, I proposed concrete adjustments for frontend behaviors and coordinated coupled changes where necessary.
  - Resolved overlapping changes with Lei Tianyun through collaborative conflict resolution and joint verification.
  - Worked closely with backend teammates and testing to reproduce, validate, and close the issues.
- Epic 5 development: contributed to PR #317 with initial scaffolding for timeslot scheduling and session configuration.
  - PR: https://github.com/SWEN90017-2025-SM1/OAS-web-based-oral-assessments/pull/317
  - Commit (focus): https://github.com/SWEN90017-2025-SM1/OAS-web-based-oral-assessments/commit/26fbaa084ea1bc32e24ea94a593819cc2c93b029
  - Highlights: introduced `AdminTimeslotController`, request/response DTOs (e.g., BatchCreate/Delete/Duplicate TimeSlots, ReleaseSchedule, SessionConfig, ScheduleStatus, and detail DTOs), and service layer contracts (`TimeSlotService`, `ScheduleService`, `SessionConfigService`) with initial implementations for schedule and session config. Also extended `BusinessError` to cover new validation paths.

Challenges

- Frontend-backend contract mismatches surfaced during the Epic 4 bug fix; required proposing UI-side changes and performing end-to-end checks together with FE and QA.
- Merge conflicts with Lei Tianyun due to overlapping file touches; resolved via pair review and agreement on API surfaces and behavior.
- Balancing backward compatibility while evolving DTO shapes and error codes; mitigated by incremental changes and targeted validations.

Plan for Next Week

- Wrap up Epic 5 (stabilize features and close remaining issues).
- Actively support QA/testing for end-to-end verification.
- Start Epic 6 planning and initial implementation.
- Participate in the technical presentation and report session.
